

## DO YOU HAVE UNIDENTIFIED CHEMICALS STORED ON YOUR PREMISES?

Industrial chemicals used in the past or left by previous occupants can be dangerous, problematic to identify and difficult to dispose of properly. These discarded chemicals are often stored in inappropriate places where they could become a hazard to human health, the environment or even be a fire or explosion risk.

TRM are a specialist environmental services company and we have the necessary expertise and resources to identify and deal with these unwanted chemicals; particularly small quantities of potentially hazardous substances.

For an initial fixed fee (\*terms and conditions apply) we will visit your premises and assess your unwanted chemicals, establish a disposal route and provide a fixed cost for their safe and regulatory disposal. Should the disposal works be ordered then we will refund the initial fixed fee. For further information and informal advice contact Dr David Johnson at [d.johnson@trm-ltd.com](mailto:d.johnson@trm-ltd.com) or by phone on 0115 932 7222.

\*Terms and conditions. This fee applies to approximately two hours on the client site which is no more than 75 miles travelling distance from our head office located in Ilkeston. Further works would be subject to our Standard Terms of Trade.
